## **Project Description:**

We had declared 5 types of users in our project these are 1. Admin, 2. Stuff, 3. Medi Team, 4. Fund Raiser 5. General User. As an admin, we had chosen to verify user accounts, update the site and check rules and regulations. Then we have featured the general user who can register on our site, they can donate to fire victims, and can also work as a volunteer.

For the medi team, we had given them access to managing blood and medicine and also for more volunteers. For the fund team, their job is to distribute the fund among fire victims and raise more funds. For Stuff, they can register and also they can communicate with each other and they can share work updates.
